JOURNAL OF COMPUTATIONAL AND APPLIED MATHEMATICS

Volume 111, Numbers 1–2, 15 November 1999

Contents

Preface

R. Barrio
Characterization of low degree *A*-stable symmetric RK collocation methods 1

A. Berger
Rigorous error bounds for RK methods in the proof of chaotic behaviour 13

M. Calvo, J.I. Montijano and S. Gonzalez-Pinto
On the existence of solution of stage equations in implicit Runge–Kutta methods 25

M. Van Daele, T. Van Hecke, G. Vanden Berghe and H. De Meyer
Deferred correction with mono-implicit Runge–Kutta methods for first-order IVPs 37

I. Higueras and B. García-Celayeta
Runge–Kutta methods for DAEs. A new approach 49

L.O. Jay and T. Braconnier
A parallelizable preconditioner for the iterative solution of implicit Runge–Kutta-type methods 63

T. Roldán and I. Higueras
IRK methods for DAE: starting algorithms 77

E. Hairer and G. Wanner
Stiff differential equations solved by Radau methods 93

G. Hall and A. Usman
Modified order and stepsize strategies in Adams codes 113

D.J. López, P. Martín and J.M. Farto
Generalization of the Störmer method for perturbed oscillators without explicit first derivatives 123

N. Del Buono and L. Lopez
Numerical methods for Hermitian unitary differential systems 133

M. Puta, I. Caşu and A. Voitecovici
Constant Poisson structures and the weighted Euler integrator 147

N.J. Ford and V. Wulf
The use of boundary locus plots in the identification of bifurcation points in numerical approximation of delay differential equations 153

S. Maset
Asymptotic stability in the numerical solution of linear pure delay differential equations as abstract Cauchy problems 163

P.M. Lima and M.P. Carpentier
Iterative methods for a singular boundary-value problem 173

N. Batens and R. Van Keer
A numerical method for a free boundary value problem arising from chemical kinetics 187

D. Lanser and J.G. Verwer
Analysis of operator splitting for advection–diffusion–reaction problems from air pollution modelling 201

F. Penzel
A boundary integral method applied to a convection–diffusion problem 217

J.A. Rodrigues
Preconditioners for nonconforming domain decomposition methods 227

J. Santos and P. de Oliveira
A converging finite volume scheme for hyperbolic conservation laws with source terms 239

H. De Schepper and R. Van Keer
A finite element method for elliptic eigenvalue problems in a multi-component domain in 2D with non-local Dirichlet transition conditions 253

C.J.S. Alves
Numerical simulations on resonance poles — the trapping case of two plane cracks 267

A. Sequeira and M. Baía
A finite element approximation for the steady solution of a second-grade fluid model 281

V. Iordan and Ş. Balint
Numerical capturing of some hydrodynamical shocks 297

R. Riaza and P.J. Zufiria
Adaptive cellular integration of linearly implicit differential equations 305

Author Index to Volume 111 (1999) 319

Author Index to Volumes 101–110 (1999) 321

Subject Index to Volumes 101–110 (1999) 337
